## DETAILED ACTION

### ***Claim Rejections - 35 USC § 102***

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

The changes made to 35 U.S.C. 102(e) by the American Inventors Protection Act of 1999 (AIPA) and the Intellectual Property and High Technology Technical Amendments Act of 2002 do not apply when the reference is a U.S. patent resulting directly or indirectly from an international application filed before November 29, 2000. Therefore, the prior art date of the reference is determined under 35 U.S.C. 102(e) prior to the amendment by the AIPA (pre-AIPA 35 U.S.C. 102(e)).

2. Claims 1-10 and 15 are rejected under 35 U.S.C. 102(e) as being anticipated by Choyl et al. (hereinafter "Choyl", US Pat No 7,339,928).

As per claims 1 and 15, Choyl disclosed a method of forwarding a data packet wherein receiving the data packet wherein the data packet includes a unicast destination address corresponding to a mobile node, generating a link-layer frame includes a broadcast address and the unicast destination address, and sending via the

broadcast address the link-layer frame to a plurality of access devices wherein at least one access device supports the mobile node (col. 3/ln. 61-col. 35/ln. 32).

As per claim 2, Choyl disclosed wherein said broadcast address is predefined (col. 3/ln. 61-col. 35/ln. 32).

As per claim 3, Choyl disclosed determining that the at least one access device supports the mobile node and forwarding the link-layer frame to the mobile node (col. 3/ln. 61-col. 35/ln. 32).

As per claim 4, Choyl disclosed wherein said data packet is an IP data Packet (abstract).

As per claims 5 and 7, Choyl disclosed wherein said broadcast address is a link-layer address and said unicast address is a network-layer address (col. 3/ln. 61-col. 35/ln. 32).

As per claim 6, Choyl disclosed wherein said plurality of access devices store mappings between supported destination addresses and link-layer addresses corresponding to the supported destination address (col. 3/ln. 61-col. 35/ln. 32).

As per claim 8, Choyl disclosed wherein the data packet further comprises a payload and the payload is included in the link-layer frame (fig. 9-12, col. 3/ln. 61-col. 35/ln. 32).

As per claim 9, Choyl disclosed of encapsulating said data packet into a link-layer frame (fig. 9-12, col. 3/ln. 61-col. 35/ln. 32).

As per claim 10, Choyl disclosed wherein said link-layer frame is discarded by access devices if they don't support the mobile node (col. 3/ln. 61-col. 35/ln. 32).
